

THE NUTS AND BOLTS

Is canyoning for me?

If you are an active person and you are ready to have fun, to be amazed, and to be challenged, then canyoning is for you! On most trips you don't need any previous canyoning experience. However, canyoning is a physically demanding activity, it involves walking on slippery and uneven surfaces, submersion in water, and exposure to heights. Participants need to be reasonably fit (equivalent to a full day of hiking or skiing). The more advanced trips require good fitness and a strong sense of adventure.

Will I be safe?

Keeping you safe is our highest priority, with having fun as a close second. Our plans and procedures are regularly audited by an external independent outdoor safety audit programme. Our highly qualified and experienced guides participate in ongoing rigorous in-house training.
