### Inside the Glacier

The northern lights may not be visible every evening but our guides do their utmost to maximise your chances of seeing them as we scout the dark wilderness for the best view. Having studied the aurora forecast and cloud cover, you can be sure that if the aurora is out there we will find it.

Enter another world, deep inside the 2500 year old ice cap of Langjökull glacier. A monster truck transports you across the glacial ice to the entrance of this subterranean world. Here you will see first-hand the colossal forces compacting snow and ice into fascinating formations. Back on the surface a Northern Lights adventure awaits.
