Vere e proprie esplosioni di colore. Il mondo sottomarino viene sottoposto all'indagine visiva dal Maestro Stjepko Mamic. Con grande realismo pittorico, l'artista proietta l'astante in un mondo magico. La cromia diviene l'essenza di una pittura che ha nel sogno la sua base di partenza. I dipinti di Stjepko ci trasportano in una nuova realtà onirica. Una realtà priva dell'inganno del segno e delle sue scorciatoie cognitive; in una realtà dominata dal colore e da linee molto ricercate. I paesaggi di Stjepko sono dei veri e propri paradisi visivi. Attraverso la raffinatezza del tratto pittorico, il Maestro, ridefinisce i valori da dare al segno. Un segno che ha smesso di vagare lungo un labirinto del quale non si conosce l'uscita, un segno che è ora in acque sicure. Stjepko Mamic è un Capitano che conduce la sua nave ad esplorare nuovi mondi. Mondi dominati dalla bellezza delle ambientazioni che lui stesso decide di condividere con l'osservatore.

The Art of Stjepko Mamic has the ability to leverage the emotional sensibility of the viewer because, through a metaphor for the unconscious projections of his desires the artist finds his expressive dimension. The fish, which the painter disseminates in the pictorial space is the key of a universe populated by Emotions. The essential features, the power of colour and the messages showing the versatility of a great passion with which he creates fantastic images.

“Storie di Successo “

The Artist Stjepko Mamić recounts in his work a world fueled by his passion for the sea, symbol of vital energy and that seems to be the only stimulus of his creative impulse. His talent, prone to a painting impressionist taste often surreal, offers us compositions played on a color strongly rhythmic gestures that clearly emphasize the vitality of an impetuous nature opulent.

Stjepko Mamić through masterly use of the brush there in conquer the message humoral which are in-

fused his works. A language that exerts on us a involving attraction of his way to make art that leads to the synthesis of the inner reflection and the contemplation of everything related to the sea. Beautiful sails and beautiful fish from the vibrant colors that seem happy to travel between the foaming waves that reflect the picturesque waves. Thus, the various paintings we can perceive the different emotions and estimate their masterful execution.

Pennellata eseguita con esperta gestualità, intensità vibrante di combinazioni e intrecci cromatici e rappresentazione figurativa di forte suggestione visionaria, caratterizzano l'arte pittorica di Stjepko Mamic. Egli osserva, da spettatore attento e sensibile la realtà circostante e la reinterpreta con fantasiosa elaborazione personalizzata e con lo sguardo del grande sognatore, che trasporta sulle tele il suo sfaccettato e camaleontico universo interiore.

Stejtko Mamic

La vitalità formale, nei quadri di Stejtko Mamic, è quella di un linguaggio con una forza interiore molto incisiva, che garantisce una pienezza espressiva d'insieme. Per lui, la pittura è fatta di regole ben precise, possiede una propria speciale "grammatica e sintassi". Per lui, dipingere è come parlare in modo ispirato, con argomentazioni concrete ed emozioni, che crescono e si moltiplicano nell'enfasi creativa. Mamic non accetta compromessi, nella convinzione che le immagini raffigurate possano avere una piena e completa proiezione comunicativa, da condividere con lo spettatore. Per lui, fare l'artista significa mettersi in gioco, giorno per giorno, tenendo sempre ben ferma e solida la tradizione figurativa, ma apportando anche delle rivisitazioni personalizzate inedite e innovative. Si rende fautore di una pittura fatta di eleganza ed essenzialità, che non scade e non trascende mai in sofisticati e ridondanti virtuosismi, ma resta saldamente ancorata ad un'ideale bellezza artistica incontaminata, sobria, garbata pulita e lineare.
