This tour is considered both relaxing and exciting as it involves concentration and silence but with the adrenaline of wondering how many fish you can get.

Upon reaching the area where the boats sail, **Cabeza de Toro or from Cap Cana**, you will receive information on safety regulations and internal company rules (behavior on the premises of the excursion, treatment of the environment, education to staff etc ...) and a brief explanation of the tour. You will be ask to sign a document that informs you of the sea conditions that day (waves, rain, wind, etc.).

We will sail out into the deep in search of big catches. Once entered into the area, that the crew understands that you can start fishing, they will proceed to call each customers in turn, as per availability and desire of the anglers in boat. Fishing is trolling. Therefore, nobody takes a stick to itself, nor holds up a fish until a fish starts to fight. If it is the case that none of the seven lines is used, the Captain will indicate which to use to avoid that they entangle each other.

Baits we use are not alive, we call artificial bait LUHRS these are only used to draw attention to fish. The possible types of fish to catch in this area are white and blue marlin, sailfish, billfish, goldfish or mahi mahi, barracuda, kingfish, whitefish, wahoo, bonito, baccarat and yellow tuna. There are other types of fish, but it is very rare to capture them.
