

Hi KIDS!

How much do you know about your heart?

Do you know it beats EVERY second, which adds up to 2.5 billion times in an average lifetime? Or that it pumps 2,000 gallons of blood EVERY day through a circulatory system that spans 60,000 miles?

Do you know you can make it work even better just by getting active and eating right?

Lub Dub invites you to take an amazing journey – a trip into your heart to explore all these questions and give you the right answers for living a long healthy life.

I'm LubDub, The Museum's Healthy Heart Mascot!

LUB DUB

That's the sound your heart makes.
