

Our History

Alderic O. "Dick" Violette started his career in telecommunications after he returned from serving in the Army during World War II in 1946. Throughout his career, Dick collected a wide variety of telephones and telephone-related items which he wanted showcased in a museum. The New Hampshire Telephone Museum was founded on May 10th, 2001 and opened its doors to the public in 2005. Since then, the museum has welcomed thousands of guests from around the world. As technology continues to evolve, the museum will be here to share the story of one of man's greatest inventions.
